

Give Yourself a Clearer View with our Bonney Uterine Polyp Forceps & Desjardins Forceps

Bonney Uterine Polyp Forceps

240mm

Desjardins Forceps

220mm

The Design Checklist

- ✓ Bonney Uterine Polyp Forceps & Desjardins Forceps have 6mm slender head sizes that improve visibility and access in comparison to the Rampley Sponge Holder, which has a 10mm
- ✓ Designed to the highest quality, used by the best clinicians
- ✓ Experience true control and clarity
- ✓ Designed to meet specified Gynaecological requirements

Bonney Uterine Polyp Forceps

- ✓ Slender strong jaw with precision aligned tips, suitable for many procedures such as polyp and coil removal
- ✓ Effective ratchet that enables a strong and robust grip, superior to the plastic Rampley Sponge Holder alternatives

Desjardins Forceps

- ✓ Ergonomic streamlined design improves visibility when removing tissue or opening the cervical os
- ✓ Used in endometrial polyp removal

DTR Medical®

AN
INNOVIA
MEDICAL
COMPANY

THE 'PRO'FILE

Clinical Value - Puts Patient Safety First

TIME

Designed to enable quicker procedures in busy hospital environments, our high quality instruments need only to be used once. Ensuring reduced risk of clinic over-runs, decreasing waiting times

LIFE

Patient experience is improved as tissue samples are gathered safely and effectively

Our instruments have been improved in collaboration with consultants to ensure they are atraumatic with smoothed edges to increase patient comfort and satisfaction

COST

Our high-quality, stainless steel Forceps avoid false economies or cheaper alternatives that require multiple packs to be opened to ensure a suitable working instrument is found. Our instruments ensure professional results, first time, every time

Clinicians' Experiences

Don't just take our word for it ...

"The Desjardins Forceps are very light and easy to use and will be more comfortable for patients. Have the advantage of having a curve on them and this means that you can actually target what you want without your hand or the stalk of the forceps being in your field of view. You actually can see into the endocervix much more easily than some of the larger forceps."

Dr Theodora Pepera, St George's Hospital NHS Trust & Parkside Hospital

"Doctors are very happy with the Bonney Uterine Polyp Forceps and cannot see the difference with a reusable alternative."

St Peter's Hospital, Chertsey – Gynaecology Department

"The Bonney Uterine Polyp Forceps are strong with dependability, have a narrow head making them perfect for endosurgical use"

Dr Hilda Dunsmore, SAS Doctor, Stobhill Hospital
