 endoscope-*i*

THE 'PRO'FILE

Safe Endoscopy Starts with a 'SNAP'

The Design Checklist

- ✓ Manufactured in collaboration with endoscope-i
- ✓ Protects healthcare workers from airborne risks and diseases
- ✓ A one-way valve that can be retrofitted to any fluid resistant Surgical Mask
- ✓ Designed with the aim to keep Clinicians safe and so better able to deliver high quality care to their patients
- ✓ Facilitates the movement of a Nasendoscope up to 4mm in diameter
- ✓ Provides better safety and care for both the Patient & Clinician
- ✓ Ensures safe passage of a Nasendoscopy through a Surgical Mask, creating an aperture for the Endoscope to pass through into the Nasal Cavity
- ✓ UK Manufactured
- ✓ **Exclusively** distributed by DTR Medical
- ✓ Instructions For Use (IFU) available on request
- ✓ Multi-award winning device for "Partnership with the NHS" & "Special Focus On COVID"
- ✓ UK Patent Application Number 2105626.2

THE 'PRO'FILE

Clinical Value - Allows Clinicians to Return to Endoscopies, Safely

TIME

Scientifically proven to reduce the prevalence of AGP (Aerosol Generating Particles) during examination¹

Removes the risk of delayed treatment to patients

Quick and easy to apply

LIFE

Any coughs, splutters or sneezes during the procedure are caught within the mask which is disposed of at the end

Protects against droplet dispersion

Current risks mean only **8%²** of the traditional 500,000 Nasendoscopies are being performed in the UK, this brand-new innovation was designed with the aim of getting Clinicians back Endoscoping patients safely

Allows for potential life-saving diagnosis

COST

Provides ENT Clinics the opportunity to reducing financial pressure by bringing back and increasing Nasendoscopy across the UK

Cost effective safety for Clinicians and patients

Clinicians' Experiences

Don't just take our word for it ...

"Nasendoscopy is a critical investigation in the diagnosis of Head and Neck cancer, but COVID-19 has had a huge impact in the ability of clinicians to perform this investigation. We have designed the SNAP to try and get clinicians back to their normal practice as soon as possible.

It's unbelievable to think that last year I would endoscope a patient with no protective equipment at all, and the essential SNAP didn't exist."

Chris Coulson, PhD, FRCS, Consultant ENT Surgeon

"On reflection we should have been masking patients for Endoscopy many years ago"

Ajith George, FRCS, Consultant ENT Surgeon
