

Environmental Policy

Innovia Medical seeks excellence in every aspect of its business and is committed to minimizing the environmental impacts of its operations while maintaining resilience to environmental risks and impacts. We are committed to meeting the requirements of **PPN 06/21** and to delivering credible, science-based carbon reduction in line with our commitments under the **Science Based Targets initiative (SBTi)**.

Our commitment is to:

- Measure and take action to reduce the carbon footprint of our business activities in line with our objectives and targets aligned to PPN 06/21 and our science-based targets.
- Continuously improve our environmental performance and integrate recognized environmental management best practice into our business operations.
- Reduce our consumption of resources and improve the efficient use of those resources.
- Manage waste generated from our operations through reduction, re-use, recycling, and responsible disposal.
- Manage our business to limit pollution and promotes biodiversity around our facilities.
- Give due consideration to indirect environmental impacts and energy performance in the acquisition, design, and location of services.
- Ensure environmental, including climate change, criteria are considered in the procurement of goods and services.
- Comply with environmental legislation and other environmental requirements to which Innovia Medical subscribes.

To meet these commitments, we will:

- Monitor objectives and targets for managing environmental performance at least annually.
- Provide Top Management with oversight of, and review of, environmental policies and performance.
- Engage with stakeholders, including communicating internally and externally our environmental policy and performance on a regular basis.
- Work with our teams, service partners, suppliers, and landlords to promote improved environmental performance.
- Monitor our recycling performance and its environmental impact.

This Environmental Policy sets out Innovia Medical's position on environmental matters and the principles and practices we will apply in conducting our business, including our commitment to PPN 06/21 and progressing our SBTi-aligned decarbonisation pathway as our targets are validated.
