

AN
INNOVIA
MEDICAL
COMPANY

Title: Industrial Engineer

Division/Department: Manufacturing

Type of Position: Full Time

Eagle Labs, an Innovia Medical Company
Rancho Cucamonga, CA
July 2021

Innovia Medical combines the experience and expertise of Summit Medical, Network Medical, DTR and Eagle Labs to help our medical professional partners elevate the delivery of care to improve patient outcomes. We develop products not just for our customers, but with our customers. Our collaborative approach cultivates innovative medical solutions for the global health care industry. Through excellence in design, supply chain management, manufacturing and customer service we put quality at the forefront in all aspects of our business.

Job Summary

Provide engineering expertise for the support of existing manufacturing operations and improvements of existing medical device products lines. This will include devising efficient systems that integrate workers, machines, materials, and information. The industrial engineer's responsibilities will include analyzing operations, designing workflows and production processes, reducing inefficiency, and ensuring that final products meet the established quality standards.

Essential Duties and Responsibilities

- Support manufacturing, helping to produce products meeting Eagle Labs quality standards, cost targets, and production schedules
- Use analytical skills to evaluate, interpret data, create reports and describe the results to company decision-makers
- Review production schedules, processes, specifications, and related information
- Design production processes that maximize efficiency and reduce waste
- Observe and evaluate manufacturing operations to drive efficiency through process improvements and upgrades
- Develop and implement process improvements and upgrades
- Assist with designing layout of facilities and determining headcount requirements
- Train staff on new processes, including written instructions and manuals
- Manage process documentation and prepare production reports

- Communicate with the Production Supervisor/Manager/Scheduler regarding machine schedule and readiness.
- Operate computer-controlled equipment
- Implement time studies and methodologies to reflect proper labor standards and costs
- Communicate with team members and supervisors on issues such as safety and production goals
- Write work instructions
- Create internal label specifications
- Provide cost and expense information as required to accounting
- Perform other duties as assigned by manager or supervisor

Experience & Education Requirements

- Minimum of 3-5 years industrial engineer experience and degree in industrial engineering or related field
- Industrial engineer work experience in medical device a plus
- Strong analytical background and ability to synthesize data into clear reporting for management and production team
- Ability to trouble shoot machinery problems/issues
- Critical thinking and problem-solving skills
- Ability to read and comprehend procedures written in English
- Excellent verbal communication, organizational and interpersonal skills
- Ability to work well in a team environment
- Software proficiency: MS Office and database experience

We offer a full complement of benefits including health, dental, vision, life insurance, 401(k), vacation and sick time. Come work for a growing company that offers a fun, collaborative environment with work-family balance.

****Please note: This position is based in the facility and not a work-from-home position****

Qualified applicants should send their resume, cover letter and salary requirements to careers@innoviamedical.com.
